

FLORIDA MANATEE

DID YOU KNOW?

Manatees can hold their breath up to 20 minutes! This allows them to sleep and eat underwater for longer periods of time.

Manatees are marine mammals that are part of a group called “Sirenians”, which also includes Dugongs. Sirenians are often called “Sea Cows”, but they are not related to cows. Their closest living relative is the elephant!

Use the QR code above, or visit zootampa.org/kids, for more fun and activities!
